Critical Habitat

For final rules, maps, and GIS data please visit:

http://sero.nmfs.noaa.gov/maps_gis_data/protected_resources/critical_habitat/index.html

North Atlantic right whale: Coastal and offshore waters from the Altamaha River in Georgia to Sebastian Inlet in Florida. There is a [proposed rule](#) to expand critical habitat to include all marine waters from Cape Fear, North Carolina, southward to about 45 miles north of Cape Canaveral, Florida.

Loggerhead sea turtle: There are 38 designated marine areas that occur throughout the Southeast Region.

¹ Florida's breeding population is listed as endangered.

² Northwest Atlantic distinct population segment.

³ The Carolina and the South Atlantic distinct population segments have spawning populations in Southeast rivers. Additional distinct population segments occur in Southeast waters.

Species Proposed for Listing Under the Endangered Species Act

Federal action agencies are encouraged to include species proposed for listing under the Endangered Species Act (ESA) in their Section 7 consultation requests. Species that are proposed for listing are those which have been found to warrant federal protection under the ESA, but a final rule formally listing the species has not yet published. By including these species in your Section 7 consultation, reinitiating consultation after the ESA listing is finalized may not be necessary.
